Interest and Dividend Income Form 2016-2017

Purpose of Form

Generally, the Interest and Dividend Income Form is requested when interest and/or dividend income is reported on a federal tax return, but either no assets or very low assets were reported compared to the income they generated. Interest and dividend income is reported on lines 8b, 9a and 9b of the 1040 and 1040A; interest income is also reported on line 2 of the 1040EZ.

General Instructions

All assets, including those held in countries other than the United States, should be reported in U.S. dollars. Please report values **as of the date you filed your initial 2016-2017 FAFSA**. If additional room is needed please attach separate pages. Do not leave any lines blank. Enter zero or 'N/A' if a line does not apply.

Student Financial Services calculates an asset value by dividing the sum of interest and dividend income reported on the federal tax return by a 4% rate of return. The resulting value reflects the amount of assets required to generate the interest and dividend income on the tax return. In the example below, a parent received \$2,500 in interest income.

$$\$2,500 \text{ (interest income) divided by } 0.04 \text{ (rate of return)} = \$62,500 \text{ (calculated asset value)}$$

In this example, we would expect to see assets and investments of approximately \$62,500 reported on this form.

Section 5 (Trust Funds)

Trust funds must be reported even if the beneficiary's access is restricted or if proceeds or distributions of the trust will not be received during the award year. If the trust is restricted by court-order for specific expenses (such as to pay for future surgery for the victim of a car accident), you must submit court documentation to verify the restriction. Please review the Trust Information Form at <http://sfs.virginia.edu/forms> for detailed information.

Sections 6 and 7

If the values reported on this form are less than the amount calculated at a 4% rate of return, you must submit a signed statement to explain why. **Statements regarding parent assets must be signed by a parent.**

Student Financial Services may request third-party documentation to confirm the values you report on your Interest and Dividend Income Form. Should you submit a form with incorrect information, you must also submit third-party documentation to confirm the correct values. Adjustments to a financial aid award as a result of submitting documentation to correct an Asset Information Request form are neither guaranteed nor immediate.

Forms received without the appropriate signature(s) or with missing information or missing pages are considered incomplete and must be resubmitted. This will delay the evaluation of your financial aid eligibility and the awarding of your financial aid.
